Fixed study domains

C1 NW Arid
22–30°N; 68–76°E

C2 Indo-Gangetic
24–31°N; 76–88°E

C3 NE Himalaya
23–29°N; 88–97.5°E

C4 South Peninsular
8–15.5°N; 75–80.5°E

C5 Central India
18–24°N; 74–83°E

C1 and C5 overlap. The five domains do not partition or cover all India.

Native centers within country and half-open boxes select each mask.
Whole-cell WGS84 areas supply weights; no grid resampling.

Frozen study domains intersected with Natural Earth5.1.1 country geometry. Bounding boxes are shown in the source coordinate system; each source mask selects native grid centers within the country and half-open box bounds and weights the whole selected cell area on WGS84. Native grids are not resampled. C1 and C5 overlap, and the five study domains do not partition or fully cover India. This is a study-domain map, not an April–June2025 rainfall map or a forecast.
